

## GOING TO THE OFFICE

Visit any office in Scotland, the north of England and Northern Ireland and the chances are that you will see workers sitting comfortably behind office screens and in seating areas that have been designed and manufactured by DS2 Scotland, a Dunblane-based company which has been supplying modular solutions to the office sector for over eleven years.

Using its own specialist in-house frame makers and upholsterers, DS2 Scotland produce a range of floor-standing and desk-mounted screens, seating and tables. Customers order these as bespoke items according to their own specifications, with orders being dispatched within two to four weeks.

“Because office furniture needs to be capable of taking the routine and often harsh punishment of the typical office environment,” says DS2 Scotland’s Sales and Product Development Manager, Dave Bissett, “our products need to be both well-engineered and stylish, and the smallest detail in our designs can make all the difference between us winning or losing an order. So when we needed help with the redesign and manufacture of a foot for our floor-standing screens, we knew that EMF’s attention to detail would guarantee the precision and finish we needed.”

**“The guys at EMF are masters at turning customer ideas into finished articles.”**

*—Dave Bissett, DS2 Scotland*

The three new versions of the screen foot required by the company had to combine a fresh modern look with high-end fabrication and finish. EMF mapped out the design concept, which took into account factors such as ease of manufacture and cost, prior to agreeing production and delivery time scales with DS2 Scotland.

“Working with EMF was really easy,” continued David Bissett. “Having all the services under one roof – from design and prototyping right through to fabrication and delivery – meant that we were able to eliminate the time and effort which we would otherwise have expended in project managing multiple contractors. No sacrifice of quality was exchanged for this convenience, and we are extremely pleased with the final product.”
